

Finally ... Someone is Building a Better Land Mobile Radio Antenna!

The Top Ten Reasons E/M-Wave Mobile Antennas Are The BEST choice for Our Dealers and YOUR Customers!

#10

Stainless Steel! - EMW radiating antenna whips are all **one-piece 17-7 or 303 Stainless Steel ... black chrome plated** for exquisite, durable appearance and a highly conductive RF signal!

#9

Extra Protection for Your Mount! - **Over-molded TPV skirt** extends down below the O-ring seal to add an EXTRA level of weatherproofing for the mount!

#8

X-NUTS Over Chrome Nuts! - A Q-Wave antenna with a solid RF path of metal-to-metal contact from the ball tip to the silver plated contact in the dual sealed weatherproof base!

#7

New Poly Springs! - **E/M-Flex springs** improved polymer design outperforms and outlasts traditional steel springs by weather sealing the tin-plated copper wire from the environment.

#6

Almost Indestructible! - All EMW radomes and housings are molded out of **high-impact resistant Xenoy™ compound** ... a Polycarbonate alloy commonly used in the automotive industry to mold face plates and bumpers

#5

No Dissimilar Metals! - Press-fit brass ball tips and adapters **enhance antenna safety and performance.** Brass adaptors, radiators, and base rings provide optimum **strength and durability.**

#4

Up to 15% More Bandwidth! - Higher gain whips with open air wound phasing coils! No ABS tubes or over-molded materials, **better bandwidth and RF conductivity!**

#3

Warranty! - E/M-Wave stands firmly behind their designs and quality with a "Best-in-Class" **Two Year Warranty on ALL models!**

#2

Performance! - Application-driven designs are guaranteed to **meet or exceed all E/M-Wave published specifications!** Compare!!

#1 Reason

More Antenna Value! - EMW combines the EMW warranty, **innovative feature-engineering, quality RF components, and a VERY competitive price!**
